

## **MEDIA ADVISORY**

### **Solar Eclipse Viewing Event to Take Place at San Francisco's Civic Center Plaza on August 21, Chance for Californians to Unplug and Conserve**

***CPUC, San Francisco Mayor Lee, and Energy Upgrade California to Host Public Solar Eclipse Viewing Event, Encouraging All to Conserve Energy on Eclipse Day, and Every Day***

**WHAT:** The California Public Utilities Commission (CPUC) and Energy Upgrade California will join San Francisco Mayor Edwin M. Lee at a Solar Eclipse viewing event the morning of August 21 to encourage San Francisco residents and business owners to unplug and head outside to watch the historic Solar Eclipse.

To kick off the viewing event, Energy Upgrade California will be on-site to distribute eclipse viewing glasses that double as coffee sleeves and will share tips for simple ways consumers can save energy when solar energy production dips during the solar eclipse.

At 10 a.m., Mayor Lee and CPUC Commissioners Carla J. Peterman and Liane M. Randolph will discuss the importance of renewable energy and saving energy in order for California to burn fewer fossil fuels and emit fewer greenhouse gas emissions when the sun is partially eclipsed by the moon in the morning hours on August 21.

By doing just one more thing to save energy on August 21 and every day moving forward, Californians can make a positive impact on our environment.

**WHEN:** Monday, August 21, 2017, 10 a.m.-11 a.m.

**WHERE:** San Francisco Civic Center Plaza, Across from City Hall on Polk Street

**WHO:** San Francisco Mayor Edwin M. Lee  
CPUC Commissioner Carla J. Peterman  
CPUC Commissioner Liane M. Randolph  
Energy Upgrade California Street Team
